ABOUT ME

I am a Front-end developer who likes simple things that work. I prototype things before I start to code and then use lightweight tools to write HTML, CSS and JavaScript. I love coding things from scratch, but I can also work with front-end libraries and frameworks.

PROJECTS

TRAVELWALE

Role:

UI/UX Design, Prototyping, Full Stack Dev.

Description:

My Engineering Final Year Project. It allows users to book Hotels, Flights, Trains, Buses and Cabs from a single location.

TUITIONWALE

Role:

UI/UX Design, Prototyping, Full Stack Dev.

Description:

Tuitionwale allows students to connect with teachers. Students and teachers sign up for an account and create their profiles.

HYPERTHREAD

Role:

UI/UX Design, Prototyping

Description:

Hyperthread is a Learning Management System that allows students and teachers to interact with each other.
